EDUCATION

ZUITT TECH PROGRAM

May 13 – 30, 2025

- Preparatory Course
 - Git, HTML, CSS
 - JavaScript
 - MongoDB

June 2025 – August 2025

- Main Course Package
 - Front-End Web Development
 - Back-End Web Development
 - Full-Stack Web Development

TECHNOLOGICAL UNIVERSITY OF THE PHILIPPINES – TAGUIG

September 2019 – January 2023

- Bachelor of Engineering Major in Manufacturing and Production

ADDITIONAL SKILLS

Proficient in Microsoft Office Suite

Problem Solving

Technical Communication

Time Management

CHRISTIAN NIEVERA

SKILLS SUMMARY

Programming and Web Development

- **Front End Web Development:** HTML5, CSS3, Bootstrap, Wireframes, Mockups, Web Design, Git and GitHub, Vercel, Responsive web app
- **Back End Development:** JavaScript, Node.js, Express.js, MongoDB, Postman, REST API,
- **Full Stack Development:** React.js, Vue.js, Vue Router, Pinia, Axios, JS DOM Manipulation, API Integration with Fetch, SDLC and Trello

WORK EXPERIENCE

Remax International Inc.

Product Support Engineer

August 2022 – February 2025

- Implemented and commissioned Eaton UPS Systems for 15+ client sites, ensuring 100% compliance with installation standards.
- Delivered user orientations to 50+ client engineers, increasing operational readiness and reducing support calls by 20%.

Provided 24/7 on-call technical support, resolving 95% of issues within agreed response and resolution times.

PROJECT EXPERIENCE

Static Personal Portfolio (Capstone 1)

[Project Link](#)

Created a fully responsive personal portfolio website using HTML, CSS, and Bootstrap to showcase technical skills, projects, and contact details. Designed a modern layout featuring a fixed navigation bar, smooth section scrolling, and mobile-friendly responsiveness. Deployed on GitHub Pages.

E-commerce App API (Capstone 2)

[Project Link](#)

Backend (Node/Express + MongoDB): Built a backend for an e-commerce application, implementing RESTful APIs for products, user authentication, and cart management. Secured authentication with JWT and bcrypt, managed data with MongoDB, and thoroughly tested endpoints using Postman.

Deployment: Deployed the backend on **AWS**, ensuring scalability, reliability, and seamless integration with client applications

PROJECT EXPERIENCE

E-commerce MERN App (Capstone 3)

[Project Link](#)

Frontend (React): Developed a responsive and intuitive user interface using React.js, ensuring a seamless shopping experience across devices. Integrated frontend components with backend APIs for product listing, cart management, and order processing, while maintaining a mobile-friendly and modern UI.

Backend (Node/Express + MongoDB): Built RESTful APIs for product, cart, and order management, and implemented secure user authentication with JWT and bcrypt. Designed and managed the MongoDB database for scalable data handling, and tested endpoints with Postman.

Deployment: Deployed the backend on AWS, leveraging cloud infrastructure to ensure high availability, scalability, and secure client-server communication.
